AXION

At ZEPELIN we design, develop and manufacture all of our products under one roof. With over 20 years of experience we make the world's finest inflatable products. We use only the highest quality materials and the most advanced technologies to produce our products.

All products are made in our own high-tech factory by a large team of people, who love their work. We are constantly investing into new technologies which help us to keep the quality of our products at the highest level, and at the lowest cost to our clients. With our in-house engineering team we are continually working on improving our products and developing the next generation of solutions throughout all of our brands.

We are committed to excellent customer service through a network of authorized experts available worldwide from our distributors. We offer a variety of warranty and after-warranty services on our products.

TENTS

the widest range of inflatable event tents

HIGH QUALITY TPU SEALED TUBES

All AXION tents are using 250mic seamless TPU bladder tubes ended by using HF welding technologies. All bladders are accommodated in strong 500D HT polyester, so the whole inflatable structure is rigid, but still flexible in a wide temperature range from cold FIS SKI events to the hot DAKAR RALLY.

SMART INFLATION SYSTEM

Patented one way central inflation system provides the luxury of one point inflation with perfect control of inflation from chamber to chamber. It also provides easy detection of eventual air leak. Smart inflation system is now included in most of AXION models.

FULLY SERVICEABLE BY USER

Such as life, when you really need your tent there is bound to be an issue. If there is, thanks to Axion it's easy to repair on the fly. We offer repair kits and thanks to the zip-off roof and central connector, any user can change the inflatable tubes on site and within minutes.

EXTREME SAFETY

In comparison to metal structure tents there are no dangerous rigid components with AXION inflatables. In comparison to the old fashioned inflatable tents with a permanent blower, sealed inflatable tents (also so called pneumatic tents) are independent of power grid. They do not require continuous inflation. AXION is one of the safest pneumatic tents on the market. Tested for up to 100km/h (62 mph) and certified for 60km/h (37 mph), our inflatable tents can withstand the most extreme of weather conditions. The structures are very flexible and will keep those in the tent safe during strong winds. AXION is designed to bend and twist with the wind and then back to its original shape.

MODULARITY

All sizes of each AXION model can be connected together by a tunnel, so a tent village can be created. More over, some sizes of different AXION models can be interconnected by tunnels too. Build an even bigger event with easy to use AXION inflatables..

REVERSIBLE WALLS

All walls are reversible. You can also get double walls with an opaque layer inside, panorama walls, section walls and more.

EASY TRANSPORT

Packed in an original trolley bag, each AXION tent can be easily transported in any personal car. This is a great advantage of inflatable tents in comparison to metal tents.

EASY

budget model
of promotional
inflatable tent

CONCEPT

AXION Easy is a high quality inflatable tent with simplified structure, respecting financial limits of our clients. Even with limited budget it provides them an opportunity to use a quality brand inflatable tent, made in the Europe, without compromises.

An EASY model is an easy concept of four independent inflatable legs nicely forming a roof with a place for four artworks to be printed by sublimation printing without color limits. Similar to other AXION models, there is a possibility to use different branded roofs with one structure, easily changeable by the zip-off technology for better promotion. The zip-off cover, walls, visors and the entire inflatable structure can be printed in full color dye sublimation upon demand.

LITE

high quality
inflatable tent
using smart
inflation system

CONCEPT

The mission in the creation of AXION Lite was to provide an easy, budget friendly, but high quality inflatable promotional tents to the market. The LITE model is an easy to use with four sealed inflatable legs conveniently forming a roof with a place for branding on all four sides, digital sublimation printing allows for printing without limits. The LITE features easily changeable zip-off roofs so that you can quickly change the branding for various promotional uses with one structure. The zip-off roof, walls, visors and the entire inflatable structure can be brilliantly printed in full color upon demand.

HANDLING and SET UP

The AXION Lite is made of strong, but lightweight polyester fabric. Using our patented AXION smart inflation system (that controls the airflow using the central valve system), the LITE model requires one person to set up within minutes. The entire tent packs down into the original trolley bag that fits into any standard sized car, making it perfect for transportation to any event.

SQUARE

wind resistant
inflatable event
tent using
horizontal
inflatable beams

CONCEPT

AXION Square is the first member of the AXION family and was developed in 2010. Features of the AXION development, like the horizontal stabilization inflatable beams, the central tube connector, the zip-off roof, and its availability in 4 sizes, make it one of the most reliable inflatable event tents in the market.

AXION Square features easily changeable zip-off technology so that brand managers can quickly change the branding for various promotional uses with one structure. The zip-off roof (cover), walls, visors and the entire inflatable structure can be printed in full color dye sublimation upon demand.

WEATHER RESISTANCE

AXION Square is proven to withstand winds up to 62 mph (100 km/h), ranking the AXION product as one of the most durable and safest inflatable tents on the market.

TRIPOD

an open space
inflatable shade
for your product
promotion

CONCEPT - AXION Tripod is a great concept for both indoor and outdoor events as an inflatable podium cover, promotional tent or as a stylish sun shelter. A zip-off roof and side walls can be sublimation printed. Enjoy its innovative shape, and airy, attractive design.

COVER AREA - The canopy of the AXION Tripod shelter is made of water resistant fabric, so there is no need to add a water proof layer in case of rain. Thanks to the innovative design of the sloped side walls, the efficient usage area is much larger. There is no need to use additional visors, as the internal space is unaffected by rain or sun. Moreover, it is possible to connect more TRIPODs together by tunnels, creating an extraordinary tent village.

HANDLING - As with our other AXION pneumatic tents, handling is very easy. The TRIPOD is packed into a trolley bag and is easily transportable in any vehicle. One person can easily transport and set up the AXION Tripod. It inflates within minutes with one valve using our patented AXION smart inflation system.

SERVICE - Thanks to the zip-off roof and the central tube connector, any user can change the inner bladder or whole inflatable arch onsite within a few minutes, without having to send the tent out for service!

HEXA

a wide open space hexagonal inflatable tent

CONCEPT

With the AXION Hexa, the primary idea was to offer a greater presence, with wider space inside and maximum access to all those, who do not wish to connect two tents together with a connection tunnel. AXION Hexa meets this task perfectly, without the creation of a funnel in the middle of the interior space. Similar to the AXION Square model, AXION Hexa is equipped with horizontal beams to provide better side stability and inflation for the structure, creating a tremendous presence for your events.

COVER AREA, HANDLING and SET UP

The AXION Hexa offers maximum space and brand visibility, covering up to 602 sq ft (56 m2). Even so, it is easy for two people to set up and install within minutes. The entire tent packs down into the original trolley bag that fits into any standard sized vehicle, making it perfect for any event or festival.

CUBE

an exciting
new pure form
inflatable event
structure

CONCEPT

The AXION Cube is a solution for all those, fed up with traditional inflatable or pop up tents. Thanks to a unique solution of a hidden water drain, the roof can stay optically flat, but will work perfectly outdoors in any rain conditions. As with all AXION products, there is no necessity for a permanent power supply!

DESIGN

The AXION Cube is a unique inflatable tent designed in a modern cube style. Different from any other inflatable tents, it offers straight vertical panels for your brand.

HANDLING and SET UP

The AXION Cube is made of strong, but lightweight polyester fabric. Installation requires just one person and the Cube can be set up in minutes. The entire tent packs down into the original trolley bag, that fits into any standard sized vehicle, making it perfect for transportation to marketing events and festivals.

SPIDER

increase your event space with a spider dome

CONCEPT - Based on the traditional spider inflatable dome concept, AXION Spider is the combination of a big hexagonal shaped dome and the unique AXION system of sealed structures. AXION Spider provides a large event space and increased height, for enhanced brand visibility. Additionally, it is the only spider tent on the market available with inflatable visors. All of this without necessity of a permanent power supply!

COVER AREA - AXION Spider is ideal for large events looking for a contemporary and unique design. It offers a floor space area of 450 sq ft (42m²) up to 860 sq ft (80 m²). It is available in a range of sizes and options including zip-off reversible walls, optional visors and branding that will help to maximize your event presence. The AXION Spider 33 ft (10m) with 3 visors, creates an event space of 796 sq ft (74 m²), providing a contemporary solution that also conforms with the legal requirements in most of countries (there is typically no need for local event, building permits).

HANDLING and SET UP - AXION Spider is made of strong, but lightweight polyester fabric with contoured legs. Using our AXION smart inflation system (that controls the airflow using the central valve system), the Spider requires no more than 2 people to set up and will take less than 20 minutes to assemble. The entire dome packs down into a compact carry bag that fits into any standard sized vehicle, making it perfect for transportation to marketing events and festivals.

SHAPE

sealed inflatable event objects

HIGH QUALITY TPU SEALED TUBES

All AXION tents are using 250mic seamless TPU bladder tubes ended by using HF welding technologies. All bladders are accommodated in strong 500D HT polyester, so the whole inflatable structure is rigid, but still flexible in a wide temperature range from cold FIS SKI events to the hot DAKAR RALLY.

INTERNAL ILLUMINATION

Take an opportunity to brighten your next event, using internal illumination with the AXION products. Both 230V plug-in or 12V portable systems are available in white or RGB versions. Thanks to the use of modern flat LED sources connected to compact click-in Li-Ion batteries, the illumination of AXION products is easy to do, and effective for any night event.

COLORS WITHOUT LIMITS

For AXION Shape objects we use the newest technologies of dye sublimation printing, automatic cutting and welding, so each object can have different full color design in high resolution photo quality.

The printed cover/sleeve can be easily zipped off and changed for different designs without unnecessary investment to create a brand new look and product.

SMART INFLATION SYSTEM

Standard inflatable arches are fully dependent on the power source. In a case of power outage an unpleasant or even dangerous situation can occur. Sealed AXION Arches are independent of power and more weather stable as they are inflated to higher pressure. For double safety each arch is equipped with an automatic pressure control system.

FULLY SERVICEABLE BY USER

Such as life, when you really need your tent there is bound to be an issue. Thanks to Axion, it's easy to repair on the fly. We offer repair kits and thanks to the zip-off roof and the central connector, any user can change the inflatable tube, onsite and within minutes.

EXTREME STABILITY

A ballast weight plate, a ballast weight bag or even their combination can be used as an accessory to any of AXION Shape products. The ballast weighting systems create extreme stability, so that the inflatable object can be balanced to the extreme angle.

Securing and stabilizing your inflatable objects at your events will no longer be a problem.

EASY TRANSPORT

The base of each AXION Shape object works as a transport bag. Just deflate the object and zip-on the top part. Similar to the easy packing of the AXION arch products, you simply zip the two bases together and get one compact disc. Simple and practical is AXION's whole philosophy

ARCH ARE

angled shape

AXION inflatable arches are slimmer than traditional arches due to their higher internal pressure. They have better weather resistance, better stability, no risk of collapse and no noise due to blowers (continuous inflation). Customers choose AXION Inflatable Arches for their easy installation and safety in use.

The AXION Angled inflatable arch is the most common arch shape for sport events offering large, excellent space for branding. The AXION pneumatic arch is the alternative to the angled shape, already well tested in hundreds of events in many countries of the world.

ARCH ARR

rounded shape

AXION pneumatic arches are slimmer than traditional arches due to their higher internal pressure. They have better weather resistance, better stability, no risk of collapse and no noise due to blowers (continuous inflation). Most of our customers are choosing AXION Arches for their easy installation and safety in use.

Due to the more difficult artwork application, the AXION inflatable rounded arches are mainly used when the artwork and graphics better suits this shape of arch. The AXION round arch provides an attractive gate and entrance way to your sporting events and festivals..

ZIP-OFF

multifunctional arch with detachable horizontal beam.

AXION Inflatable Arches are slimmer than traditional arches due to their higher internal pressure. They have better weather resistance, better stability, no risk of collapse and no noise due to blowers (continuous inflation). Customers are choosing AXION Inflatable Arches for their easy installation and safety in use.

The AXION Zip-off arch is a unique solution for all those using an arch for festivals and events, as well as events where organizers are not allowing full arches for security reasons. A horizontal beam can be detached and separately used as a vertical or horizontal tube, while the vertical corners work well as half-arches. This gives event organizers more flexibility and creativity with their inflatable arches.

TUBE

simple and versatile inflatable object.

AXION inflatable tubes are slimmer and more stable than traditional inflatable tubes due to their higher internal pressure. They have better weather resistance, better stability and no noise due to blowers. Most customers are choosing AXION Tubes for their easy installation and safety in use.

AXION inflatable tubes are available in many sizes to create a towering brand presence. They also feature the versatility and variety with the option of a simple removable zip-off sleeve/cover, giving you the ability to change your branding quickly and easily. Customers also appreciate the internal illumination of the AXION inflatable tubes for brighter, night time event marketing. The inflatable tubes are stable and sturdy, including the option of a weighted ballast plate. AXION Tube is a simple and reliable product.

CAN

shows your drink
in its real shape.

The AXION inflatable Can has the same principle as an AXION | TUBE, but is patterned in the shape of a can or package. It is a sealed inflatable with an internal bladder, and higher internal pressure than other traditional inflatable shapes. It has better weather resistance, better stability and no blower noise.

AXION Cans are available in many sizes, and in custom shapes. Customers also appreciate the opportunity to “brighten” their display with the internal illumination system for lighting up the inflatable can. The inflatable cans are stable and sturdy, including the option of a weighted ballast plate. AXION Cans are a simple, reliable and effective product.

BLOCK

flat pneumatic objects

All AXION Block inflatable objects are produced using ribbed bladders, which provide a large, optimal style and maximum surface area to promote your branding and artwork. AXION Inflatable Blocks are designed for customers who want a new, exciting look to for their events and festivals, differing from traditional inflatable shapes. They highlight your message in a very attractive and visible manner, better promoting your product or brand.

AXION Inflatable Blocks are available in many sizes, 8.2' (2.5m) to 12.6' (3.8m) in height, and feature a simple, easy to use, replaceable zip-off sleeve/cover, so your branding can be changes in minutes. As with other AXION Shape products, the AXION inflatable Blocks are durable and stable, including the use of an optional weighted ballast plate.

BLOCK LITE

POP-UP

slim and rigid
inflatable display

AXION Wall brings an advantage of popup display in a combination with sealed inflatable technology, suitable for indoor and outdoor use too. Using a technology of drop stitch fabric with high pressure inside, after proper anchoring it is able to withstand same wind as heavy duty solid display with an advantage of safe use due to the fact, that this display is inflatable. For indoor use there are nice laser cut feet available, making whole wall self standing without noise of fan. As an option there is a possibility to install LED lights to the top edge of the wall.

The wall is available in 3 size variants with fully dye sublimation printed "sock" or banners.

It is possible to save money by using different "socks" per one wall. This product is perfectly suitable for all kinds of advertising or sport events, as an inflatable billboard, sponsor wall or photoshooting wall

FLOAT

stable floating
water sport race
markers

AXION Float inflatable buoys are a special product category among the AXION products due their specific purpose for use on the water. With AXION Float you can choose a variety of different shapes and sizes of high quality sealed buoys to elevate your branding for all water sports events including triathlons, water ski, wake board, swimming, yachting and boating competitions.

AXION Float inflatable buoys are made in many popular shapes such as cube, cylinder, pyramid, cone and tube. AXION Float buoys are made of heavy duty PVC coated fabric for durability, and with all all over printing so your logo is visible to all.

FURNITURE

inflatable event furniture

HIGH QUALITY TPU SEALED TUBES

All AXION products are using 250mic seamless TPU bladder tubes ended by using HF welding technologies. All bladders are accommodated in strong 500D HT polyester, so the whole inflatable structure is rigid, but still flexible in a wide temperature range from cold FIS SKI events to the hot DAKAR RALLY.

INTERNAL ILLUMINATION

Take an opportunity to use an internal illumination in the Bistro or Bongo inflatable table. Both 230V plug or 12V unplug systems are available in white or RGB version. Thanks to using modern flat LED sources connected to compact click-in Li-Ion batteries, an illumination of AXION products is easy to be used and effective for any night event.

COLORS WITHOUT LIMITS

For AXION Furniture we use the newest technologies for dye sublimation printing, automatic cutting and welding, so each object can have different full color design in a photo quality. The printed "sock" cover can be easily zipped off and changed for different design without unnecessary investment to complete new product.

STABILITY

A ballast weight plate, or a ballast weight bag (or even them in combination), can be used as a support for the Bistro or Bongo table. The result is extreme stability. Stabilizing your inflatable objects at your events will no longer be a problem.

INFLATABLE EVENT FURNITURE

AXION Furniture is a great accessory to complete your inflatable event set. Our set of inflatable furniture contains donut seating, seat seating, tables and podiums in different shapes and combinations. It is light and easy to transport, but very stable after inflation. The complete installation of your lounge or event furniture set takes just minutes. On top of that, each AXION Furniture product is printed with sublimation technology without any risk of scratching. Make your event more friendly, comfortable and noticeable with AXION Furniture.

EASY TRANSPORT

The transport of event furniture use to be problematic, but not so with AXION inflatable Furniture. Each product is packed into a disc shape, and fits into a compact, lightweight bag for easy transport. AXION Furniture for your entire event can easily be transported in a small car or vehicle, in addition to other AXION inflatable products, already loaded in the same vehicle! Easy to transport. Easy to set up.

ACRYLIC GLASS TOP COVER

Acrylic glass top cover - very nice and useful cover especially for showrooms. We don't recommend it for frequent events, because there is risk of scratching or breaking.

TABLE

simple and reliable inflatable table for each event.

BISTRO TABLE

BONGO TABLE

Hour-glass shaped inflatable Tables are great to be used on their own, or to be combined with the Omega inflatable seat. When folded, the Table is a portable disc shape of only 32" (80cm) diameter and 5" (12cm) height, weighing only 31 lbs (14pounds) in the carry bag. Set up is easy; in just a minute you will have a perfect promotion or catering table. The inflatable body is air sealed. No permanent fan is needed after inflation. The AXION Inflatable Tables are well pressurized, and more stable than any others in the market. An optional steel ballast weight plate is available for outdoor events, and an internal LED illumination light creates a special atmosphere while highlighting your printed logo on the Table. AXION Table is a simple and reliable product for each event.

There are two models available - the BISTRO model is 43" tall, great for standing; the BONGO model is 28" tall, ideal for use in combination with Omega seat.

	BISTRO	BONGO
Diameter "Ø" (ft)	2' 7"	2' 7"
Height "Y" (ft)	3' 7"	2' 4"
Thickness when packed in a bag (ft)	0' 6"	0' 5"
Weight (w/o shelves) (lbs)	28.7	24.2
Dye sublimation print all over	possible	
Fully serviceable by user	yes	

PODIUM

straight or curved shaped

CURVED PODIUM

STRAIGHT PODIUM

AXION Podium is an excellent product for point-of-sale campaigns, sampling programs and information kiosks. It comes with an easy to use transport bag that is compact in size and weighs only 13pounds. One person can inflate the two tubes within 5 minutes resulting in a great, fully functional podium with a solid top and bottom. Inflatable tubes are air sealed, and a permanent fan is not needed after inflation. You have the flexibility to place two shelves in between the inflatable tubes, as well as, add a white or RGB light to illuminate it from the inside. The entire surface area of the podium can be printed in full color dye sublimation upon demand.

There are two models available – **Curved** Podium or **Straight** Podium
Just choose one that fits your needs.

	STRAIGHT PODIUM	CURVED PODIUM
Width "X" (ft)	3' 11"	3' 11"
Depth "Z"(ft)	1' 4"	1' 6"
Height "Y" (ft)	3' 5"	3' 5"
Thickness when packed in a bag (ft)	14	14
Weight (w/o side walls, w. acc.) (lbs)	37.5	39.7
Dye sublimation print all over	possible	
Fully serviceable by user	yes	

SEAT

inflatable seat
for individual or
groups

A standard set of chairs and table will not easily fit into a regular sized vehicle. The AXION seat options easily solve this problem for your event.

You can choose from different styles – The You and Omega Seats are horse shoe shaped and great for groups, they are also designed to be paired with tables. The Omega fits with the round table and is made to easily get in and out of. It is comfortable seating for up to 4 people. The You seat is designed to fit with a foldable pop-up table and offers seating up to 5. The Bistro and Bongo seats are comfortable options for one person. They offer a patented combination of air and polystyrol for cushioning in the most comfortable way compared to the budget version.

All of our seats can be branded for your needs and also come in standard colors.

	OMEGA SEAT	YOU SEAT	BONGO SEAT	BISTRO SEAT
Width "X" (ft)	-	6' 1" - 8' 0"	-

CHILLOUT

CHILLOUT
FURNITURE –
for comfort at
your event

SINGLE CHAIR

TABLE

DOUBLE CHAIR

AXION | CHILLOUT is a set of inflatable furniture, containing a single chair, a double chair and a table. Our goal was to make an inflatable furniture, which is really comfortable, so people may relax there for hours. On the other hand we wished to meet budget limits of clients, not willing to spend too much for inflatable furniture. And of course we focused to bring a new design to the market. The result of our development is a great combination of all above.

AXION Chillout is a perfect event solution.

It is nice to use it just as it is, without additional costs. Those who would wish to put a branding on it, may combine dye sublimation printed "sock" on the back support tube, seat mattresses or both. The sock is attached with zippers, so the different one may be used for each event. A table may be equipped with an acrylic glass board, UV printed on the bottom side.

	SINGLE CHAIR	DOUBLE CHAIR	TABLE
Width "X" (ft)	4' 3"	5' 11"	2' 10"
Depth "Z" (ft)	3' 11"	3' 11"	2' 10"
Height "Y" (ft)	2' 4"	2' 4"	1' 1"

FLAG BANNERS

available in three popular shapes

Do not forget to order flag banners to complete your event set. Our flag banners are available in three popular shapes as Wing, Drop or Brick. Each shape has three available sizes. For flags we are using high density FR rated tafetta fabric, which is printed by indirect sublimation method (paper transfer). Therefore, our flag banners do not release a waste pigment in a first rain. Due to using high quality inks, the printing is shiny and well UV resistant.

The fiberglass rods are in the best quality, crack resistant in high or cold temperatures. A bottom tension bar is available as a useful accessory for those, wishing to get perfectly shaped flag banners. Different bases are available for different surfaces. You can choose a spike, steel plate or steel cross with a water ballast bag.

	WING S	WING M	WING L	DROP S	DROP M	DROP L	BRICK S	BRICK M	BRICK L

TENTIFY

ORIGINAL TENTS, DOMES AND SHELTERS
LET US
TENTIFY YOUR EVENT

TEPEE

is a simple and effective covering of the event area

STAR TENT - TEPEE

We offer you a high quality and stylish design with our star tent. It will make your event nice and representative with full print graphics. Star tent is designed to offer you nice looking and representative tent for your event. Star tent is developed and designed to meet all safety standards worldwide.

Transport collapsible central pole – quick set up – ready to use

Our star tents are designed to cover surface up to 753 sq ft. TEPEE is developed and designed for customers who's are looking for representative and fully brandable product. Easy to pack into the bag and transportable in personal car with unique collapsible central pole with hook to stretch the roof to the right shape. Set up time up to 30min from car to ready built star shade.

EYE- catcher

We offer star tents with diameter up to 183' and high 64' which are impossible to miss in crowd. Fully brandable with DYE-sublimation printing without any colour limits makes this tent visible everywhere. Our Tepee creates attractive star look and makes good atmosphere of any kind of event. Perfectly suitable for festivals, trade marks, weddings, company or sport events.

Hard surface solution

Star shade is frequently used for events with soft ground. We developed for you solution for hard surface ground. We offering you steel plate with rubber screw compatible with alluminium foot. Design and final look with new decorative alluminium foot make Tepee more compact and helps to hide top of pegs visible from ground.

QUICK

instant pop
up shelters
for events and
promotions

POP UP TENT

We manufacture pop up canopy tents with high quality hexanal aluminum frames for promotions and events. Made from high quality printable waterproof fabrics 500D. Ready to be fully customized and supported by accessories such as side walls, half walls, visors, or rain gutters to connect two tents together.

Full sublimation print

We offer full print on pop up shelters including roof, walls, half walls. Dye-Sublimation printing changes the look of tent to high quality marketing product. Your pop-up tent could be printed without limits to meet customer needs.

Transport vs. Set up time

Our pop-up tents include a trolley bag which perfectly fits the size of frame and custom top. The bag makes easy and comfortable to transport the tent in your car. The fabric used for pop up tents have unique patterns and fit perfectly with the frame. Taking the trolley bag from your car and setting up your tent takes only few minutes and your tent is ready to use.

Quality vs. Price

We offer for you budget friendly solution how to TENTIFY your event. Supplied with durable aluminum hexanal frame and covered with high quality 500D waterproof fabric. Our walls are zippered to each other for durability and protection. Delivered with spikes to anchor them to soft ground and ropes for anchoring in case of windy conditions. Hard surface solution. For those who want to use pop up canopy tents on concrete or hard surfaces, we offer optional accessories such as ballast bags or 44 lb steel plates.

STRECH

alternative to
any traditional
marquee or
outdoor event
tent

Stretch tent

If you are looking how to TENT-ify your event with some fresh designs, you are on right page. Just couple of minutes away from purchasing your own tent for your events.

Stretch tents are the best solution for creating memorable events with an absolutely unique atmosphere. It is currently very popular for covering an area on uneven surfaces for weddings, festivals, parties, and company events will never be boring because every time you TENT-ify your event with a new shape. There are endless options for stretch tent set ups.

Made with love

We offer stretch tents completely made in house. All development, design and manufacturing all happens under one roof in our new 32,000 sq. ft. manufacturing facility. Stretch tents branded by TENTIFY logo can challenge wind up to 65 mph.

Lightweight fabrics

With the most innovative fabrics on the market we make sure all safety standards are looked and followed. For smaller sizes up to 28x39 ft we are using lightweight Stretchflex 300g/m2. Bigger sizes are made from stronger Formatex a durable and resistant fabric for covering bigger areas from 1080 sq. ft.

Transportable in car

One of the key features for our stretch tent is easy transport. To compare with, "party" or frame tents, our stretch tents are transportable in personal car. We offer two sizes of collapsible poles. With collapsible poles you are not limited to using a VAN or small TRUCK for transporting because they are packed in a 4.5 ft. long bag for easy carrying in personal car.

Fast and easy setup

Putting up a stretch tent is not difficult. A big advantage is that you don't have any limits on how to set it up. Every way is the correct way and you can make new shape of your tent any time. To setup the biggest size, 49x66 ft. takes about an hour for 3 people. Sizes up to 26x33 ft. could be done by one person in about 30 minutes. In a short time, you can have a stylish covering for your event or party.

IGLOO

multi purpose,
extra-strong
geodesic domes

STAINLESS STEEL STRUCTURE

When looking into the production of galvanized steel structures we decided to find a better solution. Stainless steel geodesic structures are far better in comparison. By the time you peel off little fragments after using galvanized steel, let's just say it could look better at events. We decided to offer you a high quality and durable stainless-steel geodesic dome. Stainless steel never loses its finish and looks better for many years. Stainless steel is the stamp of the very best quality.

RESISTANCE

Previous experiences have showed us these are structures without limits. Our geodesic dome was used for an ice statue exhibition in High Tatras national park. It performed well in wind storms with speeds up to 87 mph and a whole lot of snow.

COVERING

Our robust stainless-steel geodesic dome is covered by high quality certified PVC fabric. Fabric can be modified as you wish. With doors, windows, bay windows or sublimation printing. We don't have limits on customizing your geodesic dome. We are able to provide a solution for heating, air conditioning, flooring, internal lighting.

USAGE vs. ACCOUSTICS

All the key features give geodesic structures limitless options for usage. It's possible to use geodesic dome for concerts, parties, exhibitions, trade shows, weddings, festivals, even for glamping (New way of camping made from two words galmourous and camping). Great acoustics guarantee you the best event and unforgettable experience.

FLOWER

symbiose of the design and a technology

DESIGN - The unique design of the AXION Flower event structure is inspired by nature, and brings new emotion and creativity to a conservative world of event displays. Different in all aspects, the AXION Flower provides positive energy to people inside with an asymmetric shape, and always fresh air inside. Each petal is an independent part of the structure, a different size, moving in its own way in a strong wind, similar to a real flower.

HANDLING - The unique design of the AXION Flower event structure is inspired by nature, and brings new emotion and creativity to a conservative world of event displays. Different in all aspects, the AXION Flower provides positive energy to people inside with an asymmetric shape, and always fresh air inside. Each petal is an independent part of the structure, a different size, moving in its own way in a strong wind, similar to a real flower.

TECHNOLOGY - The AXION Flower is a combination of three materials. The shape of petals is guaranteed by a patented system of high pressure pneumatic tubes, inflated to nominal pressure 2,0 bar (10x more than the standard pneumatic structures). The tension of the petal membranes is produced with FR certified, high tech Bedouinflex PU stretch membrane. The weight of whole stand is created by using steel components for the central pole and perimeter plates, in a combination with water ballast bags.

WEATHER RESISTANCE - The AXION FLOWER is certified according to the Eurocode standards for wind up to 62 mph (100 km/h). In the case of a thunderstorm or strong winds, the sleeve of central pole can be retracted down to decrease the total height of the whole structure by 4.26 ft (1.3m). Water floating to the center of the stand is drained through a central gutter. Optional triangle shades around the perimeter are used to protect the inside area against water, as well as offering more shade, and increasing efficient size of the AXION Flower dome by 15%.

BEAM SPACING

ERA | SPACE EFFICIENT

Space efficient high pressure inflatable tent for military, rescue and fire departments

NIXUS | ERA (Efficient Roof Angle) is the only modular high pressure tent with angled beams, offering geometry with more vertical sidewalls and better internal space efficiency.

There are two versions of the construction. The 200 cm beam spacing version is a heavy duty tent primarily intended for accommodation purposes, while the 250cm beam spacing (referred to as RB (Reduced Beams) version) is designed for fast deployment and wherever lower weight and transport volume is important. For the same reason, there are also different types of outer fabric, weighing from 650g/m² to 250g/m².

Same as with other NIXUS tents, the tough structure of ERA tents is made of heavy duty seamless pneumatic tubes of 6" (150 mm) diameter, working pressure in tubes may vary between 60 – 120 psi. The minimum (collapse) pressure is 21 psi, while the safety valves are set to 116 psi.

With such a wide pressure range ERA tents are the first choice for application in the harshest conditions from extreme cold areas to the desert and tropical climates.

The greatest advantage of high pressure tents in comparison to low pressure solutions is their resistance to temperature fluctuations. There is no need for a permanent pressure control or running blower. Recommended interval of internal pressure check is only once a week. Each tent is packed in a strong PVC waterproof bag, with an opt on of additional transport packing in aluminum or Clip-Lok boxes. Directions and repair kit are included with each tent.

WIDELY MODULAR

PGK | LOW PRESSURE Modular inflatable shelter

NIXUS | PGK is a modular low pressure inflatable tent for all types of use (First Responders, base camp, mobile hospital and much more). The inflatable tubes are made of HF welded heavy duty PVC, working pressure in tubes is over 435 psi with an automatic pressure control system.

The canopy is made of 500D polyester fabric with waterproof PU coating or 1000D both sides PVC coated opaque fabric, both meeting B1 fire retardancy requirements. A variety of accessories as inner liners, sunshade, floor tiles and inner electric and furniture equipment is available with PGK model.

NIXUS | PGK is modular and can be interconnection with similar tents, but also has a large range of component options.

Typical outer canopy of PGK military tents is made of 650g both side PVC coated opaque bi-color fabric, suitable to extremely high and low temperatures.

Typical outer canopy of PGK fire & rescue tents is made of 500g both side PVC coated fabric, or 250g one side PU coated fabric.

PGK tents are available in ST, SH or SI version.

LITE

BRANDABLE

from one unit

EXTREME LIGHTWEIGHT

setup by
ONLY ONE PERSON

LITE | FAST AND HANDY

Lightweight modular inflatable tent

Lightweight modular inflatable tent for quick use (first responders, first aid courses, and events). Pneumatic tubes are based on 2-layer system (light, but durable PES fabric + internal TPU bladder), working pressure in tubes is 362 psi.

Canopy is made of 500D polyester with PU coating on back side, providing basic waterproofness and B1 certified fire retardancy.

LITE may be packed in a heavy duty roller bag or backpack, and is possible to be carried by only one person! Whole tent is inflatable with electric, hand pump from one inflation point within few minutes, using our patented SIS (smart inflation system). Whole canopy and side walls are printable by dye sublimation or screen printing technology for promotion purposes or simply have your logo added.

EQUIPMENT

RBT – Rescue boat

- This product is designed for rescue on water and ice. RBT is an inflatable boat made of rigid PVC fabric with flat bottom made of inflatable dropstitch fabric.
 - RBT is a product for professional rescue, where the buoyancy is created by tubes, inflated around the perimeter of flat bottom, made of heavy duty dropstitch fabric. For more safety there are three independent air chambers.
- Openings, created between inflatable tubes and the bottom in the front and back part of the boat allow a person to easily enter the boat from the water.
- A durable rope is placed around whole perimeter of the boat. Detachable sledge blades help to move the boat on ice. An engine may also be attached.

RBT	Width "Y"	Length "x"	Height "Z"
rescue boat	4' 2"	16' 0"	2' 4"

RBD – Rescue board - SUP

- RBD is kind of SUP board made of high durable, anti-slip TPU fabric.
 - RBD is an easy to use and extremely useful tool mainly for beach guards, but its small packed size is allowing professional rescue teams to add it into their inventory too. Inflation takes just a minute.
- There is a set of strong handles on either side, so people can easily grip the board. The board may be personalized by colors and design.

RBD	Width "Y"	Length "x"	Height "Z"
rescue board	2' 3"	10' 6"	0' 6"

RPH – Rescue Platform

- RPH is an emergency walkway made of durable PVC dropstitch fabric, suitable for rescue on water, ice or mud.
 - RPH is a modular product, able to be interconnected to create a long path, or to use it separately as floating platform.
 - Thanks to the rigidity of pressurized dropstitch fabric, it is very stable and does not bend. The top of the platform is equipped with anti-slip EVA foam. Corner handles for easier manipulation and perimeter ropes are the standard part of each unit.
- Same as RBT Boat, RPH Platform is a perfect solution for combined water and ice rescue, well suitable to the muddy terrain also. RPH is normally available in one standard size, contact us for your customized model.

RPH	Width "Y"	Length "x"	Height "Z"
rescue path	4' 4"	16' 5"	0' 6"
